Sources: UCR Part I Offenses are derived from Metropolitan Police Department's Incident Based Reporting System in accordance with UCR definitions and guidelines established by the FBI. 2023 counts are sourced from MNPd ARMS on 7/17/2024.

*Note: The Motor Vehicle Theft crime rate was recalculated for the period from 2016-2019 because of a change to how motor vehicle registrations are classified in Davidson County. Excludes semi-trailers. * In 2012, the definition of rape for UCR changed in MNPd one year in advance of changes that were implemented by the FBI on 1/1/2013. As a result, the crime rate of rape beginning in 2012 is calculated based upon the overall population estimate.

RED: Last known year with rate lower than 2023

BLUE: Lowest rate since history of Metropolitan Government and Davidson County
